

Online County Location Coding Form Web Application

The TDO (Traffic Data Office) at WSDOT has implemented a new Online County Location Coding Form (**CLCF**) web application. As of June 1, 2006 hard copies of the CLCF forms are no longer sent to counties. All CLCF processing is now conducted online. County personnel responsible for collision data must contact the WSDOT Traffic Data Office to receive their login to the new system.

After your data entry is added into the online system, the data goes through a quality review at TDO and then monthly data feeds get downloaded into the Collision Location and Analysis System or **CLAS** inventory in Mobility. The CLAS inventory data in Mobility is read-only and available for your analysis and reports.

Contact Paul Snow of the WSDOT Traffic Data Office to sign up and receive your login to the new system.
